

## Paracrine Signaling in the Pancreatic Cancer Microenvironment: Novel Therapeutic Targets and Clinical Opportunities

### Presented by:

Steven Hughes  
Professor and Chief of Surgical Oncology  
University of Florida

### Faculty Disclosure:

Dr. Hughes has disclosed that he has no relevant financial relationships. No one else in a position to control content has any financial relationships to disclose.

### CME Advisory Committee Disclosure

Conflict of interest information for the CME Advisory Committee members can be found on the following website:  
<https://cme.ufl.edu/disclosure/>.

**Release Date:** February 1, 2020

**Expiration Date:** January 31, 2022

### Target Audience:

Primary Care Physicians, Specialty Physicians, Surgeons, Surgical Oncologists

### Learning Objectives:

As a result of participation in this activity, participants should be able to:

1. Identify limitations of current research models of pancreatic cancer with respect to immunity.
2. Understand the role of cell-cell communication within the pancreatic cancer microenvironment.
3. Describe potential mechanisms of tumor tolerance in pancreatic cancer.

**Accreditation:** The University of Florida College of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

**Credit:** The University of Florida College of Medicine designates this enduring material for a maximum of 0.25 *AMA PRA Category 1 Credits*<sup>™</sup>. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

**Contact Info:** If you have any questions please feel free to contact Steven Hughes at (352) 265-0535 or at [Steven.Hughes@surgery.ufl.edu](mailto:Steven.Hughes@surgery.ufl.edu)
